

## LADDERS

### Standard Ladder LS

Available with 2, 3 or 4 steps. A popular general purpose ladder perfect for most concrete pools. Simple to install using either the 'POOLDECK' unique 'LADDER MOUNTING FIXTURE' or 'FLANGE MOUNTING KIT'. No alteration to the ladder is necessary.

### Coping Mount Ladder LU

Available with 2, 3 or 4 steps. A ladder specially designed to suit pools with narrow surrounds. Smooth return bends on handrail allows fixing to be made only 150 mm from pool wall. Use either 'POOLDECK' unique 'LADDER MOUNTING FIXTURE' or 'FLANGE MOUNTING KIT' to fix to deck. No alteration to the ladder is necessary.

### Deck Mount Ladder LP

Available with 2, 3 or 4 steps. Made specially for pools with fabric liners. Bolts directly to the pool surround. Legs do not touch the side or floor of pool to damage liner. Can also be used for fibreglass pool with suitable surround.

### Cantilever Ladder LR

Available with 2, 3 or 4 steps. A ladder designed for fibreglass or vinyl lined pools where fixing is only available away from pool edge. Mounts directly into the deck, overhangs pool, legs do not rest against wall or floor of pool.

## GRAB RAILS

Used as an alternative to pool ladder where wall steps have been cast into the pool wall. Grab rails ensure a safe and convenient means of entry and exit to the pool.

### Model G1

Figure 4 style combines functional beauty with considerable strength, suitable for both residential and public pools.

### Model G2

These 'P' style grab rails present a sleek low line appearance adding beauty and safety to any pool. Suitable for most residential pools.

### Model G4

'D' style grab rails specially designed for pools with narrow surrounds. An attractive and economical design for residential pools.

### Model G5

'D' style grab rails specially designed for pools with narrow surrounds. Supports are transversely mounted.

## STAIR HAND RAILS

A must for pools with walk-in entry steps. Can be used singularly or in pairs. Provides that added safety to overcome the hazards always present with wet and slippery steps. Manufactured from 38 mm diam. stainless steel tube polished to a gleaming mirror finish. All stair hand rails are complete with cover plates and anchor pins for anchoring directly into surround or can be fitted with flanges for bolting to existing surround.

### Hand Rail Model MPS

A general purpose hand rail with a multitude of uses. Can be used as a kick rail or safety rail where only short lengths are required. Bolts directly to the pool wall. Available in 7 convenient stock sizes - 300, 450, 600, 750, 900, 1200 & 1500 mm.

### Stair Hand Rails Model HS

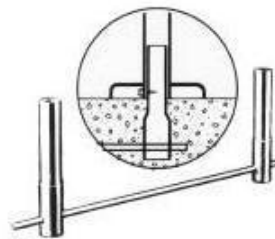

For concrete pools with walk-in steps. Anchors into deck and bottom step. 2 stock sizes, 1200 mm and 1500 mm wide, available. Also custom fabricated to your design. Submit drawings for our quotation.

### Deck Mount Hand Rail Model HD

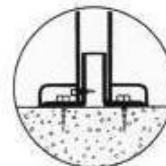

Designed specially for fibreglass or vinyl lined pools with entry steps. Anchors into deck and protrudes over steps.

## FIXTURES

### Unique 'Pooldeck' Ladder Mounting Fixture

Simplifies the installation of the popular models LS and LU ladders. Cast directly into the pool surround during construction it enables the pool and surround to be completely finished before the ladder is fitted, speeding up pool construction and preventing damage to ladder. Ladder can be easily removed by pool owner at any time for pool maintenance or installation of pool covers.

### Flange Mounting Kit

With this kit, converting a LS or LU ladder to deck mounting is simple. Just tap spigot of flange into ladder rail and secure, then attach flange to deck (all fixings provided). Cover plate clips over flange concealing all fixing, providing a smooth neat finish.

Spigot to rail and flange to concrete fixing, included in kit.
